5,736,139). In making the rejection, the Examiner indicated her presumption that the subject matter of the various claims was commonly owned at the time any inventions covered by the claims were made absent any evidence of the contrary. The applicants have now appreciated that certain of the claims were not commonly owned at the time the invention was made. The Examiner indicated an obligation under Rule 56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the Examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a). As the Section 103 rejections have been withdrawn in view of the applicants previous arguments, such further disclosure is not believed to be required however the Examiner is requested to advise the undersigned if otherwise in which case the applicants would be happy to provide any further requested information.

The Examiner is requested to contact the undersigned if anything further is required in this regard or if a teleconference would be helpful.

A Notice of Allowance is requested.

Respectfully submitted,
